

# Course policy on the use of GAI in homework and project

**Policy:** Students may use any GenAI system for any purpose on (non-communication) assignments in this course.

**Rationale:** In your future studies and employment, you are likely to have access to generative AI. You will need to be discerning about how you use (or don't use) AI output, and when your use of AI supports your understanding versus when it simply gives you an answer. To help you prepare for this future, we are trusting you to be judicious about when and how you use GAI. Through in-class assignments and exams, you will have opportunities to demonstrate your own understanding and mastery of the course material (in the absence of AI support).
